# What's rematoriums ?

## The idea behind this project :

5 dumb guys bored to be scam every day..Fify, Robin Hood, Sickle, Yop and DeepWalls as **dev, illustrator, marketing, design** and **technic**.

As the Doge token we havent really a project but **we assume it** ! It is a new way of thinking with a **Real earning token** !

We are glad to introduce you, our new little token the Krematoriums. It is a **fair token**.

We are the first token to burn 10% and redistribute 10% for the holders.

We won't tell you that we a have a great plan to provide something in 6 months or more even if we hope this token could survive this much.

So we can resume it like that we have only 2 commandments

As a good little token **Burn like Hell, holding onto Heaven**  
That's all, and it is not so bad.
